

AirBoom SP

(Single Chamber Inflatable)

Application Guide

AirBoom SP is an ideal choice for areas where conditions (frequent use, limited manpower, etc.) dictate the use of a reelable boom. Perfect for storage on elevated docks at marine terminals or as a readily transportable response package when stored on trailer mounted boom reels.

Can be inflated with high volume, low pressure backpack inflators, or integrated reel mounted hydraulic blower.

Canadyne AirBoom SP is a single point inflatable boom suitable for a wide range of marine environments. Storage on boom reels allows for easy deployment, retrieval and transportation.

Features and Benefits:

- ◆ **Single point inflation.** Entire boom is inflated from a fitting located at the end of each boom.
- ◆ **Interconnection hoses** allow for multiple booms to be connected together yet still allow single point inflation.
- ◆ **Low pressure** design for maximum wave conformance.
- ◆ Wide range of sizes and fabric choices.
- ◆ **Internally compartmented** multi-chamber design.
- ◆ **ASTM, Universal or Hinge and Pin** style marine grade aluminum boom connectors to mate with existing equipment inventories.
