

Canadyne Power Pack Model DH07Y-2 Specifications

Model: Canadyne Model DH07Y-2

Length: 50 inches (1270 mm) including handles

Width: 38 inches (965 mm) to outside of wheels

Height: 44 inches (1117 mm) to top of valve handles
34 inches (864 mm) to top of frame

Motor Drive: Yanmar 7.0 HP, air-cooled, electric/recoil start

Pump: Direct coupled gear pump (3600 psi, 250 bar max pressure). Factory setting 1500 psi (100 bar) at approximately 4.2 gpm (19 l/min) flow

Controls: **Dual circuit**, to drive two pieces of equipment simultaneously i.e. skimmer and transfer pump

Output & Controls: Engine speed and stop control, twin speed controls, twin forward and reverse controls

Instruments: Hydraulic system pressure, fuel level gauge, hydraulic oil temperature, level indicator

Hydraulic Tank: 10 gallons (45 litre) capacity, fitted with return oil filter, level gauge and oil temperature gauge.

Construction: Welded aluminium, wheel mounted with handles for easy transport.

Paint: All fabricated components will be powder coated International Orange except for working surfaces and gauges.
